Álvarez-Díaz & Villalón's Journey to Streamlined Operations with Monograph

✓ 25% Profit growth   ✓ 2x Efficiency gain   ✓ 2x Confidence boost

Before Monograph
Time was not being tracked accurately. Overhead was not accurately measured. Seeing how the project was doing in real time was not possible; we had no tool that did that.

Decision Criteria
Because of the ease of use, the fact that it is specifically designed for A&E firms, the training provided to us by Monograph, and the constant updating of the platform in response to the users' feedback.

Use Case
I use it to track time, to see Monograph's performance, to track overhead, and to invoice.

Biggest Surprise
Being able to see an accurate picture of the firm's finances. Before Monograph, invoicing and time tracking were managed on different platforms by different teams, so the data was neither accurate nor in real time.

> " Monograph provides a hassle-free platform to track performance, measure time, and allocate resources to facilitate profit. "
