Juniper Engineers’ Journey to Streamlined Operations with Monograph

-  25% Profit growth
-  50% Efficiency gain
-  2x Confidence boost

Before Monograph

We used Excel files and other hour tracking software to manage finances. Monograph has been great for keeping everything in one place, and saving us time.

Decision Criteria

It was suggested to us by our comptroller.

Use Case

I use it daily to manage project finances and hours.

“ Convenient system for logging hours, work, and project management. We use it across all projects, and it really helps keep all of our budgets in line, and lets us know where there are deficiencies. ”
