4D Architecture's Journey to Streamlined Operations with Monograph

✓ 33% Profit growth

✓ 4x Efficiency gain

✓ 4x Confidence boost

Before Monograph

I was previously using BQE Core, which was slow and not as intuitive.

Decision Criteria

Monograph was designed by architects for architects, and I was attracted to the colors!

Use Case

I use it daily as the hub where most of my business information is stored. My favorite feature is the Project Gantt.

Biggest Surprise

The annual performance awards were a pleasant surprise, because I get a lot of satisfaction from validation.

“ Monograph is a fantastic tool that keeps my business organized with easy to use color-coded projects, quick invoicing, simple time tracking. ”
