# Pegasus Architecture's Journey to Streamlined Operations with Monograph

- ✓ 50% Time saved on admin
- ✓ 4x Faster billing process
- ✓ 66% Less budget overage

## Before Monograph

We were using Microsoft Access to manage projects and invoicing, which was outdated and inefficient. The cost comparison for Monograph was equivalent to retaining a coder to update and maintain the software. The most logical move was to transition to Monograph so that we could spend more time with our projects than worrying about the back end.

## Decision Criteria

Monograph was the most user friendly interface at the right price.

## Use Case

We have some opportunity for utilizing the reports more extensively.

## Biggest Surprise

The addition of we could ditch the other services that we had before. an all-in-one was the best transition for us to make things less complicated in the admin sector.

“  
**The best tool we have ever implemented. It is a seamless interface that is user friendly and accessible without downloading and maintaining software. What more could a firm ask for?**  
 ”
