# Studio Core Architects' Journey to Streamlined Operations with Monograph

✓ 25% Profit growth

✓ 4x Efficiency gain

✓ 50% Confidence boost

## Before Monograph

I was using an Excel spreadsheet to do the math and keep track of project management, then generating an invoice in word each month, and then inputting the invoice into QuickBooks - it took several days each month that has now changed to less than a day.

## Decision Criteria

Monograph has the Architectural specific features I need, such as Phasing and consultant markups.

## Use Case

I use Monograph for project planning and Invoices. I like the Gantt chart aesthetics.

## Biggest Surprise

The Invoice and QuickBooks linking.

“ I have been enjoying using Monograph for its project planning and staffing for my small firm. The invoices are attractive and link well with my QuickBooks account. ”
