Red Brick Consulting

## Red Brick Consulting's Transition to Fast Firm Management with Monograph

- ✓ 25% Time Saved on Admin
- ✓ 2x Faster Billing Process
- ✓ 25% Less Budget Overage

Before Monograph, Red Brick Consulting was bottlenecked by manual invoices and disjointed project tracking. Workdays were filled with tasks that consumed excessive time and left room for errors.

“  
**Monograph saves me so much time for invoices, and tracking time with detailed notes to know when we are on target for projects for billing and project timelines.**  
”

The decision to transition to Monograph was driven by the need for concise timesheet management, comprehensive project oversight in one place, and a formalized invoicing system—features lacking in other offerings they had considered. These capabilities are critical within the fast-paced environment of engineering consultancy where precision timing often interplays directly with profitability.

What Emily appreciates most about Monograph is its ability to handle multiple essential operations with grace. Tracking her team's time, maintaining up-to-date project timelines, and streamlining the invoice process is now manageable from one centralized platform. The simplistic yet powerful tools have significantly reduced administrative overhead and eradicated redundant manual processes.
