# StudioGWA's Journey to Data-Driven Management from BQE to Monograph

25% Profit Growth

2x Efficiency Gain

50% Confidence Boost

Before Monograph, StudioGWA struggled to get real-time updates on project finances from BQE Core. This made it difficult to make timely and data-driven decisions.

“

**I love being able to get the information I need in real-time, I don't have to run a report. And it's fast, no waiting around for information to load. I can get so much more done compared to our previous system.**

”

Today, the firm uses Monograph for essential tasks like tracking time and expenses, forecasting workloads, managing invoicing and payments, and even PTO tracking. One of the standout benefits for Jonathan is the ability to provide instant project updates when requested. This quick access to information not only enhances his efficiency but also significantly boosts his professional image within the firm.

In summary, switching to Monograph has been a strategic move for StudioGWA. With its intuitive design tailored specifically for architecture and engineering firms, alongside real-time data capabilities and ongoing software improvements based on feedback, Jonathan highly recommends it as an indispensable tool for any A&E firm aiming for operational excellence.
