BRNS Design's Evolution to High Efficiency from Harvest to Monograph

✓ 50% Time Saved on Admin   ✓ 4x Faster Billing Process   ✓ 50% Less Budget Overage

Before Monograph, BRNS Design relied on Harvest for time tracking but managed profitability, schedules, project teams, invoicing, and consultant billing across different platforms. They lacked a streamlined process, making project and firm management a constant struggle.

> " **Monograph is so helpful for our leadership to be able to evaluate profitability, staffing, and make decisions about the future of our company.**
>
> **We love using Monograph at all levels of our company.** "

Today, BRNS Design use Monograph to get clarity and control to their operations. The platform's real-time data allows the firm to build precise budgets and assign staff confidently, streamlining our project management process. Its design-centric reports make interpreting complex data effortless, enhancing decision-making across the firm. Monograph's all-in-one capabilities have sped up their invoicing process and improved consistency in project delivery and results.

As a result, BRNS Design can now easily evaluate profitability and staffing, identify which projects are falling behind or most profitable, and make smarter, faster decisions about the future of the firm.
